In an increasingly data-driven and cyber-oriented world, organizations need employees who both identify and solve the challenges posed by the internet. I have a voracious appetite for learning and am deeply interested in mobile development, web accessibility and cybersecurity. I am a creative and articulate full stack web developer well-versed in React, Redux, vanilla JavaScript, and Node. I also enjoy playing chess and speaking Mandarin Chinese.

## Skills

**Frontend:** JavaScript ES6, React, Redux, HTML5, CSS3, jQuery, Wordpress

**Backend:** Python, Node, Express, MongoDB, Mongoose, PostgreSQL, Knex.js

**Workflow:** Git, Github, Travis CI, Heroku, Yarn, NPM

**Others:** Mandarin Chinese, Agile Development

## Recent Projects

### Symphesis

Full stack online collaborative music making app

### Wikipython

Python tool that scrapes Wikipedia articles and outputs a word cloud

### Jellylist

A gift list app for sharing with friends and family

### Hànzì

A spaced-repetition Chinese language learning app

## Experience

### **Denison University**

*Web Consultant*

Granville, Ohio  
*Feb 2015 – Present*

When I began working as an intern for Denison's website it was newly-released and modern but riddled with errors and inconsistencies from untouched legacy content. Using SiteImprove's Quality Assurance software I manually corrected and combed through hundreds of pages of content, both legacy and new. Ultimately, I was hired on as a remote web consultant to help protect Denison's digital brand by ensuring high quality content that engaged users.

## Education

### **Thinkful**

*Web Development Intensive*

*February - June 2017*

Completed intensive, four month course on modern full stack JavaScript development.

### **Denison University**

*BA, East Asian Studies*

*August 2012 - December 2016*

I led Denison's Global China Connection organization as Co-President, was a Dean's List student and an Alumni Scholarship recipient. Studied abroad in Shanghai, China during the Summer of 2015.
